DETAILED ACTION

Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance: ***

The prior art is replete with teachings of hot wax dispensers each having similar features to the applicant's claimed invention, however, the prior art does not explicitly disclose not reasonably teach to one of ordinary skill in the art the combination of features as claimed by applicant, in particular, a hot wax dispenser, comprising: a cup located below a bulk heating bowl; an insert located in said cup; and a first heating element attached to said heat conductor for melting wax and wherein said melted wax can flow from the wax placed on a grate, through said grate, into said bulk heating bowl and when released into said insert in said cup.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The closest available prior art is Debourg et al. (US 5847363) which discloses all the claimed subject matter of claim 1 except the insert in the cup. There is no teaching in the art to suggest an insert would be desired in the cup of Debourg since the cup is specifically designed as an applicator and the use of an insert may interfere with its use as such. Similarly, Pandolfi et al. (US 6935535) discloses the invention in claim 1 with the exception of the grate and the cup insert. Although the use of a grate for supporting and straining a meltable product is known in the art and its use would be obvious, there is no suggestion in the art that a liner/insert for the cup is needed or desired in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
